HIGHLIGHTED SOFTWARE APPLICATIONS/ PROJECTS

- Stock track KE— this is an application under the finance and investment category that helps the user track stocks of companies listed on the Nairobi Securities Exchange. I created both the frontend and backend of the application. The backend is done in Python and front end is implemented using flutter. This application is still in development, however a working demonstration can be organized upon request.
- Personal Portfolio — this is my personal portfolio page that helps me better explain my skills, projects and capabilities.
Github URL—https://alvnka.github.io/personal_portfolio/
- Event-it— this is an application that was jointly done with my colleagues in campus. It was an application that would allow one to post events and the events would be viewed by people within the location of the event. It was mainly aimed at enhancing the social life of campus students.
