Frontend development

- JavaScript
- TypeScript
- HTML & CSS
- React
- React Native

Backend development & deployment

- Python
- Django
- NodeJS
- Bash
- AWS (EC2, S3), GCP (Compute Engine, Cloud Storage)
- Application deployment with **Nginx + Unicorn + pm2**
- Linux server setup and optimization

Database management

- Mongo Db
- Mongo engine
- Firebase real time DB
- Firebase cloud Firestore

Source control

- Git

App management

- Google play console app management
- Apple Store connect app management

Project management

- KPI Analysis and Optimization
- Metric-Driven Decision Making
- GitHub scrum board usage

SUMMARY

Experienced Software Engineer with 2+ years of experience building scalable, high-impact software solutions. Skilled in web and mobile development, backend systems, cloud technologies, and AI model training, with a strong focus on generative AI. Proven track record of leading projects from concept to deployment and maintenance, delivering reliable, user-centric applications. Passionate about leveraging technology to solve real-world problems and drive innovation.

EMPLOYMENT HISTORY

Software Engineer | Product Manager, iZola Limited

August 2023 – present

- Experienced in generative AI, mobile development (React Native), and data science.
